Captain Arshom Sviridov

-Contacted Major Verity for assistance in locating an individual connected to Inquisitor Roke, with whom the Mityellan 3rd has a score to settle. A picture seems to indicate this individual is Interrogator Montalban, though Captain Sviridov referred to him as Inquisitor Gideon. This adds credence to the theory that Montalban and Gideon are one in the same, but also indicates that he may be masquerading as a lower level agent than his true rank.

-Appears to have several contacts on Asterion, some of who directed them to us in their search someone who might have knowledge of/contact with the local Inquisition.

-The Major is fairly confident that Sviridov is not hiding ulterior motives; his and the Mityellan's only aim is to find and kill Inquisitor Roke, and anyone else responsible for the losses they took on Eventide.
