Silensia Aprecii

[Heavy Encryption]

-A woman, formerly part of the Norimar Labor force, who has come under the influence of the Shard Entity.

-Silensia views the Shard as her child and is set upon aiding it in its quest for understanding, as well as protecting it from destruction. She and a now dead co-conspirator were responsible for extracting and injecting the needles of the Shard that caused the events of the Norimar Corpse Starch Factory Incident.

-Both she and the Shard were convinced to cooperate with the Keojrah-Glynt Company by Ambassador Lethe, and have been secretly moved on board the *Gilded Comet*, where they presumably remain.
