Subterranean

- The 508
- The Cinquefoil Reliquary

The 508

[Heavy Encryption]

-A permanent encampment of the Chosen 508 descendants of the 508th Light Infantry Regiment of the Imperial Guard, deep with the Lava Tube networks below Asterion

-Has developed into a self-sustaining colony that continues to hold a line against Xenos organisms that appear linked to the Cinquefoil presence on the planet

-Locations within the settlement include the Command Lodge, the Enge (which contains a Reactor), the Omry (Resource Storage and Repair), a Mess, and a Chapel. Appears to have three entrances; Westgate, Eastbraid, and the North Junction.

-Presence of Xenos organisms indicates that a source may be found near the 508's position; merits further investigation.

-A rogue Castellan Robot, previously a component of Vector van Flange's retinue, is likely still roaming the tunnels near the 508; instructions on how to safely neutralize and transport the device have been relayed to the Guard.

The Cinquefoil Reliquary

[Heavy Encryption]

-The location where the Nemesis Artifact was discovered; see the Lava Tube Xenotechnological Incident.

-The tunnel nearest the Reliquary shows signs of artificial creation.

-Status since the Incident has not been verified; it is possible that the Cinquefoil within lives.
