Chemicals

Samples of various chemicals were obtained on the Asterii Cathedral. All require further testing, though some are labeled (so to speak):

Vigil Device Vials: Chemical vials that can be slotted directly into the hardware of a Vigil Device:

-"Sustenance" (bears chemical similarity to Asterion Tonic and the fluids of Cutters)

-"Life"

-"Celerity"

-"Vigil" (Lazarus has reported that he intuitively understands this substance to be dangerous.)

-"Torpor" (Storage empty, no samples obtained.)

Laboratory Chemicals: Assessment Required
